

ARPIT TANDON **Power BI CV**

Lead Digital Consultant | Data & Analytics Manager | Power Platform Solution Architect

Staines-upon-Thames, UK | +44 07587 301008 | arpit.tandon.uk@gmail.com | [LinkedIn](#)
UK ILR - No Sponsorship Required | British Citizenship Approved | Available Immediately

PROFESSIONAL SUMMARY

- Lead Digital Consultant, Data & Analytics Manager and Power Platform Solution Architect with 15 years of experience delivering enterprise BI, automation, data and Microsoft Power Platform solutions for Fortune 500, FTSE 250 and major global enterprise clients worldwide.
- Proven client delivery across Chevron (USA), BP (UK), Shell (Global), DOW (USA), Heathrow (UK), Motiva (USA), Atlantic LNG (Trinidad and Tobago), Metro Vancouver (Canada), RC Yanbu (Saudi Arabia), Turkish Petroleum (Turkey), CATS (UK), BPCL Refinery (India), COP26 Glasgow (UK), Google-Wood Net Zero JV (Global) and Mubadala Energy (UAE / Global).
- Deliver end-to-end Power Platform solutions across Power Apps, Power Automate flows, Power BI, Dataverse, SharePoint and Microsoft 365 integration, covering discovery, architecture, build, governance, deployment, user adoption and operational support.
- Chaired global Power Platform training with Microsoft US and organised a global hackathon based on real business use cases.
- Member of a global team designing a Power BI Standards Initiative across the organisation, Developed a reusable standard Power BI template for global enterprise adoption.
- Created reusable Power BI and Grafana custom visualisation plugins/components in TypeScript and React for advanced chart types not available natively in Power BI, enabling richer insights and reusable client-ready delivery.
- Power BI SME with experience training 1,000+ technical and non-technical staff across client sites and global business units.

CORE COMPETENCIES

- Power Platform Architecture: Power Apps, Power Automate, Dataverse, SharePoint, Microsoft 365, approval workflows, role-based access, audit trails, ALM-aware delivery and governance.
- BI and Data Strategy: Power BI standards, reusable templates, KPI frameworks, semantic modelling, reporting governance, self-service analytics, executive dashboards and adoption enablement.
- Enterprise Delivery Leadership: stakeholder workshops, requirements discovery, roadmap definition, solution design, delivery assurance, user training, change enablement and global rollout.
- Project Controls & PMO Analytics: cost management, schedule performance, risk exposure, change control, forecasting, earned value indicators, resource capacity and portfolio-level KPI reporting.
- Data Engineering & Integration: Azure, SQL Server, Azure SQL, Microsoft Fabric, Data Lake, Databricks AI/BI, dataflows, ETL/ELT concepts, REST APIs and multi-source data integration.
- Custom Visualisation Engineering: TypeScript, React, JavaScript, Power BI custom visuals/plugins, Grafana plugins, Plotly Dash, Python/Flask and reusable component design.

TECHNICAL SKILLS

- BI / Analytics: Power BI, DAX, Power Query, Power BI Report Server, Microsoft Fabric, semantic models, dataflows, dashboards, KPI reporting, SSRS, Grafana, Excel automation.
- Power Platform / M365: Power Apps, Power Automate, Dataverse, SharePoint, Microsoft Teams/email automation, approval workflows, forms, document libraries, role-based security and governance.
- Cloud / Data: Microsoft Azure, Azure SQL, SQL Server, Azure Data Lake, Fabric OneLake/Lakehouse concepts, Databricks AI/BI, enterprise data warehousing, ETL/ELT concepts and REST APIs.
- Development: TypeScript, React, JavaScript, Python, Flask, Plotly Dash, custom visualisation plugins, reusable Power BI templates, API-style integration and full-stack POC delivery.
- Delivery / Leadership: Agile delivery, solution architecture, data governance, stakeholder management, executive reporting, vendor/client management, training delivery and team leadership.

PROFESSIONAL EXPERIENCE

Wood Group - Lead Digital Solutions Consultant / Power Platform Solution Architect | London, UK | Feb 2020 – Present

Wood Group – Global digital, engineering and operations consultancy with 35,000 employees across 50 countries

- Lead end-to-end digital, BI and Power Platform delivery for major global enterprise clients, covering discovery, architecture, solution build, governance, deployment, user adoption and post-go-live support. Architect and deliver Power Apps, Power Automate, Dataverse, SharePoint and Power BI solutions for operational workflow automation, document governance, approval processes, compliance visibility and management reporting.
- Chaired global Power Platform training with Microsoft US and organised a global hackathon, converting practical business scenarios into Power Apps, Power Automate and Power BI use cases.
- Contributed to the global Power BI Standards Initiative and developed a reusable standard Power BI template covering navigation, themes, KPI layout, filters and executive-reporting consistency for global adoption. Engineered 41 reusable custom visualisation plugins/components in TypeScript and React for advanced Power BI and Grafana chart types not available natively, reducing repeated bespoke development across client engagements.
- Serve as Power BI, reporting and visualisation SME, training and supporting 1,000+ technical and non-technical staff across Houston, Aberdeen, London, Chennai and client sites.
- As Power BI and Power Apps SME, supported the Wood project controls team and other clients in delivering project controls and PMO analytics solutions across cost management, schedule performance, risk exposure, change control, earned value indicators, resource capacity and portfolio-level KPIs to improve delivery visibility and governance.
- Built Python/Flask and Plotly Dash proof-of-concept applications, including backend development, sample data hosting, API-style integration and visualisation layers for client demonstrations and pre-sales delivery.

Bharat Petroleum Corporation Limited (BPCL) - Manager, Data & Analytics | Mumbai, India | Jun 2011 - Jan 2020

Bharat Petroleum Corporation Limited (BPCL) - Fortune Global 500 integrated energy company and one of India's largest public sector enterprises, operating large-scale refinery, supply chain, retail, finance, HR and enterprise operations.

- Built, mentored and managed a 15-member BI and analytics team including software developers, database resources, network/Windows administration and reporting specialists.
- Led enterprise reporting and analytics delivery across operations, production, maintenance, supply chain, energy, utilities, quality/LIMS, HSSE, economics/finance, HR/support services, KPI reporting and business analytics.
- Delivered 1,500+ dashboards and reports supporting 100+ business users, improving reporting accuracy by 20% and reducing manual data preparation effort by 30%.
- Implemented an enterprise business performance management and intelligence platform integrating plant systems, SAP, LIMS, MES, historian data, SQL, SSRS, Power BI and operational applications.
- Designed Power BI, SSRS, Siemens XHQ, Dash/Plotly and process-graphics solutions, including 700+ Power BI widgets and automated month-end reporting packs.
- Established BI service delivery frameworks, reporting standards, data governance protocols and reusable templates adopted across the organisation.
- Contributed to an award-winning analytics programme recognised by the NASSCOM IT Users Award for Operational Excellence and CSI National Award for Excellence in IT - Advanced Analytics.

SELECTED CLIENT AND DOMAIN PORTFOLIO

- **Atlantic LNG (Trinidad and Tobago) - Power Apps / SharePoint / Power Automate:** Delivered a production-grade inspection and document-control app with iPad-native data capture, live photos, structured reports, approval workflows, controlled publishing, restricted archives, role-based access and audit trail.
- **Global Staff Management and Resource Capacity Tool (Global) - Power Apps / Power Automate / Power BI / Dataverse:** Built an end-to-end management solution to capture staff capacity, resource allocation, overheads and utilization, using automated workflows and Power BI dashboards for global visibility.
- **CATS Pipeline Management (UK) - Power Apps / SharePoint / Power Automate:** Delivered an end-to-end workflow application with approximately 20 screens, email approvals, follow-up automation and full process-cycle tracking.
- **Chevron Refinery (USA) - Power BI / SharePoint:** Built trainee analytics dashboards using percentile-rank logic, page-level filtering, sub-unit analysis and final scorecards for management review.
- **DOW (USA) - Power BI / Grafana / Sustainability Analytics:** Developed real-time carbon emissions dashboards, multi-source trends and event monitoring to support compliance and sustainability performance.
- **Heathrow (UK) - Envision (Wood BI Tool) / Executive Carbon Strategy Dashboards:** Delivered carbon strategy and executive dashboards covering year-wise emissions, scope distribution, activity categories, fuel type, net-zero progress and priority tracking.
- **BP (UK) - Power BI / Work Readiness Analytics:** Built readiness tracking dashboards for permits, work packs, activities and operational KPIs including completion windows, status, rank and isolation analytics.
- **Mubadala Energy (UAE / Global) - Power Apps / Power Automate / SharePoint / Power BI / Dataverse:** Designed an enhancement approach for business and operational document governance, reducing risk of incorrect or outdated documentation, inconsistent approvals, audit preparation effort and limited compliance/performance visibility.
- **Shell (Global) - Power BI / Operational Visualisation:** Delivered Smart Choke visualisation for pipeline-riser systems, supporting interpretation of slug suppression and operational performance data.
- **Motiva (USA) - Cognite / Python / Plotly Dash:** Built interactive lubrication schedule and planner dashboards with callbacks, complex filtering and dashboard-based data update capability.
- **Turkish Petroleum (Turkey) - PI Vision / Real-Time Visualisation:** Led delivery and ongoing maintenance of 50+ PI Vision graphics, improving real-time operational visibility and decision-making.
- **RC Yanbu (Saudi Arabia) - Power BI / Digital Document Library / Carbon Analytics:** Developed environmental and carbon-footprint dashboards covering permit approval, document library, TCO2 reporting, emission source views and PDF/JPEG outputs.
- **COP26 Glasgow (UK) - Power BI / Net-Zero Scenario Analytics:** Developed interactive visualisations for flight carbon footprinting and net-zero pathways, allowing scenario comparison across demand, carbon pricing, fuel efficiency, SAF and zero-emission aircraft assumptions.
- **Google-Wood Net Zero JV (Global) - Digital Strategy / Net-Zero Analytics:** Supported refinery-related scenario definition and business use cases for net-zero digital analytics.
- **Metro Vancouver (Canada) - Digital Reporting / Analytics Engagement:** Client/project exposure across enterprise reporting and digital analytics delivery.
- **BPCL Refinery - Mumbai and Kochi (India) - Power BI / SSRS / SQL / Enterprise Data Integration:** Delivered cross-domain enterprise reporting covering process units, maintenance, production, supply chain, energy, utilities, quality/LIMS, support services/HRM, HSSE, economics/finance, KPI reporting and business analytics.
- **Global Power BI Standards Initiative (Global) - Power BI Governance / Reusable Templates:** Designed reusable Power BI standards and templates covering navigation, themes, KPI layouts, filters and executive reporting consistency, adopted enterprise-wide across Wood Group.
- **Custom Power BI Visualisation Plugins (Global) - TypeScript / React / Power BI / Grafana:** Created reusable advanced visual components for chart types not available natively, improving insight depth and reducing custom-build effort for client teams.

EDUCATION, CERTIFICATIONS AND AWARDS

- Bachelor of Technology (B.Tech.) - Information Technology.
- Microsoft Certified: Azure Data Engineer Associate.
- Microsoft Certified: Power Platform App Maker Associate.
- Databricks: AI/BI for Data Analysts.
- Awards: NASSCOM IT Users Award for Operational Excellence; CSI National Award for Excellence in IT - Advanced Analytics.
- Client General Manager Appreciation Letter for enterprise BI development.
